

## Pharmaceutical Services

Physicians order medications which are coordinated by the Nurse and can be delivered to patients place of residence at no extra charge. Nurses can pre-fill medication planners and teach the patient and/or caregiver compliance with medication regimen.

## Wound Care

• **Home V.A.C. Therapy:** V.A.C. Therapy creates an environment of wound healing at the cellular level. Physician can select from variety of wound therapies.

V.A.C. Therapy

Baxter Intermate®

Infusion Pump

## Labs

• **Diagnostic Instruments:** CLIA-waived approved diagnostic instruments for Prothrombin Time/ International Normalised Ratio (PT/INR) and Hemoglobin (Hgb) testing right at patients place of residence. The agency provides laboratory quality results that are available for immediate reporting to the patient's physician.

Blood Hemoglobin (Hgb) level

Blood Glucose Level

Prothrombin Time (PT)  
International Normalised Ratio (INR)

## Medical Supplies

Arrangements can be made for direct purchase or reimbursement through medical insurance plans. DME such as: oxygen concentrators, nebulizer machines, CPAP machines, oxygen tanks, hospital beds, walkers, wheelchairs, commode chairs, canes, lifts and other similar equipment.

## Prior to Admission

Nurses can visit patients in long-term nursing facilities, skilled nursing facilities, short-stay acute and long-term care hospitals, inpatient psychiatric hospitals or units.

## Medical Equipment

• **Electronic Ambulatory Infusion Pumps:** Abcor has access to most ambulatory pumps on the market and can provide the pump that the physician prefers.

• **BAXTER INTERMATE®:** This system is a single-use, fixed-rate, positive pressure system for the delivery of medications including antibiotics and antivirals. It is completely portable and does not require the patient to be tethered to an IV pole. It can be carried in a pocket or pouch. This product gives patients the freedom to take their dose with them when they leave the home for infusion at their convenience.
